

Recognized Progression Education Resource Suite

Helping you to build a strong and ethical governance structure to manage security operations

The Recognized Progression Education Resource Suite is offered for free to ICoCA members and affiliates.

What is it?

- A suite of education resources that assists companies with limited resources or experience to build a strong, ethical governance structure, that helps them towards meeting the expectations of the International Code of Conduct, and therefore ISO 18788 and the other ICoCA recognised standards.
- A number of the fully certified member companies have successfully drawn on these resources over the last few years.
- As a paid up ICoCA member or affiliate company – MSS Global are pleased to back up our support of the ICoCA through offering 1 free license for per company to draw on these resources.

How do you use them?

We'd suggest there are 2 broad approaches....

- **For affiliates and transitional members**, we'd strongly recommend you follow our recognized progression route. This will provide you with a handrail along a logical, business orientated learning pathway, by taking you step by step through the resources and helping ensure you have the sound governance foundations in place from which to then build.
- The second approach is aimed at supporting **fully certified members**. As companies with proven governance systems in place, we'd suggest exploiting these resources for staff learning, education and continuous professional development. By selecting particular topics, you can focus on developmental themes, and help ensure continuity of understanding as you bring new people, or promote personnel to higher management levels.

Phase	Topic Scope
Final	International accredited certification to recognized standards
Silver	Performance management and improvement: <ul style="list-style-type: none"> • Key Performance Indicators • Internal Audit • Management Review
Bronze	<ul style="list-style-type: none"> • Business planning – high level & operational • Human resources management • Specialized risk assessment (including human rights)
Foundation	<ul style="list-style-type: none"> • Strategy, Objectives & leadership • Risk management • Resourcing and understanding your supply chain
